

M.Tech. in Energy Technology and Management

Thapar Institute of Engineering & Technology at Patiala has announced the launch of M.Tech. Programme in Energy Technology and Management from the academic year 2014-15. School of Energy and Environment (SEE), will be offering this program. The school has qualified and experienced faculty, and rapidly developing modern laboratories, and despite being the youngest in the Institute, it is very much known at least in the northern India for its research and consultancy services in the energy and environment areas. The M.Tech. program in Energy Technology and Management is a sincere effort of the Thapar Institute of Engineering & Technology in the direction of development and make available of technical man power in the areas of energy technologies and energy management. The programme is aimed at educating the graduates, specially, on the non-conventional and renewable energy resources and technologies, and on the demand side management of energy for conservation and efficiency. The program is kept regionally relevant through offering Bio-energy Technologies, Solar Energy Technologies, and, Energy Conservation and Management as specializations. The School of Energy and Environment envisions to work in close collaboration with the industry in offering the program. Students of this program will do one-year internship with the industry. Graduates from almost all branches of engineering and technology, and post graduates in physics and chemistry are eligible for admission to this multidisciplinary and interdisciplinary M.Tech. program. And, the students will be trained for a successful career in the energy industry; regulatory agencies and academia.
